

## Checking the Goal State

```
if node.state == goal:
    print('goal reached!')
    moves = []
    temp = node
    while True:
        moves.insert(0, temp.action)
        if temp.depth == 1: break
        temp = temp.parent
    return moves
```
